

Złota Pasieka

Złota Pasieka Trójniak

Sweet

Nature's best offering – honey - takes up a third part of our Golden Apiary Trójniak's composition. It is a member of the broad family of meads and has enjoyed a global recognition for its unique taste appreciated even by the most demanding experts. It is renowned for its unforgettably gentle, honey-scented and one-of-the-kind flavours. On cold days it will show its best when served hot or to add to your cup of tea, while on hot and sunny days it is usually served chilled with a slice of lemon and a few ice cubes.
